

## **The Symmetry Advantage**

Did you ever wish that you could count on your printer for a little more than just getting the job done? Like accommodating an unexpected rush. Or keeping an eye on every stage of the production process to catch errors. Or being meticulous about meeting deadlines and commitments. Or just spending some extra time with you to select the right stock and figure out the best printing process for your job. There are still printers who do that. We know because we're one of them. Here are just a few of the things that make us different:

### **We only know how to do a job one way—right.**

We're perfectionists. We admit it. We work very hard to get our clients the results they need, when they need them. When things take surprising turns on a print job—and they often do—we figure out what it's going to take to get the job done properly. Symmetry's first thought is how we're going to get our clients what we promised them. Wouldn't you like to work with printers you can count on to keep their promises? Give Symmetry a try.

### **We know what to look for, so you don't have to.**

A surprising number of elements go into any print job—from understanding the options for paper stock to knowing which inks could take longer to dry to recognizing what to look for on a press check. All of these things and more can have a profound impact on your job. Get it right, and you get great results. Why risk it? Put our 25+ years of experience to work for you.

### **Our extensive network of relationships gives us flexibility you won't find anywhere else.**

Usually, by the time a job finally gets to the printer, it's urgent. Everything took just a little longer than you expected, and now you really need the final product in a hurry. You might find that the printing shop you go to is too busy to meet your deadline. Or that they don't have the correct press for your job. Or that they can't get the stock you are looking for. Fortunately, Symmetry's network of relationships gives us the ability to place your job where it can be done right, fast and at a reasonable cost. Even if it seems impossible. Ask us to tell you about some of the times Symmetry has saved the day for our clients.

Symmetry. Because printing isn't always black and white.
